

USA Volleyball Transgender Guidelines

USA Volleyball supports the inclusion of transgender athletes in USA Volleyball events in the gender in which they self-identify, yet also prioritizes a fair and competitive landscape. As such, subject to applicable laws and regulations, all athletes over the age of 12 wishing to participate in the gender that differs from their birth gender are required to provide medical documentation to the USAV Gender Committee demonstrating that their testosterone levels do not exceed the upper limit of the normal reference range in their desired gender of play for their age group.

The USA Volleyball transgender guidelines do not apply to athletes desiring to represent the United States in the Olympic Games, Paralympic Games and all other international competitions which are under the control of the relevant governing body.
